

# Multi-Family

**PIONEERING**  
ENVIRONMENTS

Through innovative and efficient design, our goal of improving the lives of everyone that lives in, works near, or visits these multi-family communities is realized. We listen closely and interact frequently with our clients in order to understand their needs and provide solutions. This approach has kept CTA on the industry's leading edge.

# Multi-Family

In numerous cities, suburban living is declining, with many – ranging from young professionals to baby boomers – preferring to now live in rented environments central to work, food, and fun. CTA designers achieve successful multi-family structures by understanding and helping guide these trends; and by generating designs for thoughtfully laid out, long-lasting, multi-family micro-communities.
