

Healthcare

PIONEERING
ENVIRONMENTS

CTA's expertise in the healthcare sector centers around improving the lives of patients and staff through innovative and efficient design. We listen closely and interact frequently with our clients in order to understand their needs and provide solutions. This approach has kept CTA on the industry's leading edge. In fact, Modern Healthcare magazine has ranked CTA in the list of its top 100 architectural design firms for healthcare in the U.S. every year since 2003.

Healthcare

The CTA Approach

Today's medical projects are complex, demanding and highly technical. Long-term energy consumption, life cycle costs, regulations, and user efficiency must be carefully balanced with managing finite resources, enhancing patient care and fostering a healthy atmosphere. CTA's Health Group maintains a clear focus on these priorities.
